

MICHELIN

Airstop

OUR GENERAL AVIATION INNER TUBE

MICHELIN Airstop "right-sized" tubes are designed to provide an **outstanding fit** between the tube and the contour of the tire casing cavity.

This optimal tube and tire fit reduces the possibility of creases, folds and air loss, resulting in a **more reliable**, longer lasting tire and tube combination.

Excellent Air Retention

Exclusive MICHELIN butyl rubber compound offers outstanding air retention properties.

Highly Reliable and Easy to Install

"Right Sized" optimal fit between the tube and the tire casing.

Built-in Balance

Unique tube design assists in achieving overall wheel assembly balance.
